Weekly Coal Production

Production for Week Ended:
September 17, 1988

100,000,000

100,000,000

See Coal Highlights

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. Supplement 1 includes monthly and annual U.S. level data on coal production, consumption, stocks, imports, and exports. Supplement 2 contains detailed monthly data covering electric utility coal consumption, stocks, and receipts (quantity and price); and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1986*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson under the direction of Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202/586-8800).*

Port of Los Angeles, Coal Highlights.

Summary

U.S. coal production in the week ended September 17, 1988, as estimated by the Energy Information Administration, totaled 19.7 million short tons, a 6.6 percent increase from production in the previous week. Coal production east of the Mississippi increased by 1.0 million short tons (9.1 percent), and production west of

the Mississippi increased by 0.2 million short tons (2.9 percent).

This week's coal output was 0.4 million short tons or 2.3 percent higher than in the corresponding week of 1987.

Figure 1. Coal Production

Table 1. Coal Production

Production and Carloadings	Week Ended	
	09/17/88	09/10/88
Production (Thousand Short Tons)		
Bituminous ¹ and Lignite	19,608	18,380
Pennsylvania Anthracite	86	95
U.S. Total	19,694	18,475
Railroad Cars Loaded	128,302	120,773

¹ Includes subbituminous coal.

Notes: 1987 and 1988 data are preliminary. Total may not equal sum of components.

Sources: Association of American Railroads, Transportation Division, Weekly Coal Production Report; and State mining departments.

Table 2. Coal Production by State
(Thousand Short Tons)

Region and State	Week Ended		
	09/17/88	09/10/88	09/19/87

Source: Energy Information Administration, *Annual Pros*,
DOE/EIA-0363(88)(April 1988).

Although most coal exports leave from ports on the east coast, Los Angeles exported more than a million short tons in '87-- exceeding the total for all other west coast ports.
